

application.AddProductUse
Case.execute

application.SellProductUse
Case.execute

domain.product.Product.get
Brand

```
graph LR; A[application.AddProductUse Case.execute] --> D[domain.product.Product.get Brand]; B[application.SellProductUse Case.execute] --> D;
```

The diagram illustrates a dependency or data flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'application.AddProductUse' on the first line and 'Case.execute' on the second line. The bottom box contains 'application.SellProductUse' on the first line and 'Case.execute' on the second line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the top-left corner of a gray rectangular box on the right. The arrow from the bottom box points to the top-left corner of the same gray box. The gray box contains the text 'domain.product.Product.get' on the first line and 'Brand' on the second line.
