

application.AddProductUse
Case.execute

application.SellProductUse
Case.execute

domain.product.Product.get
ProductLine

```
graph LR; A[application.AddProductUse Case.execute] --> D[domain.product.Product.get ProductLine]; B[application.SellProductUse Case.execute] --> D;
```

The diagram illustrates a dependency or data flow. On the left, there are two white rectangular boxes. The top box contains the text 'application.AddProductUse' followed by 'Case.execute' on a new line. The bottom box contains 'application.SellProductUse' followed by 'Case.execute' on a new line. On the right, there is a gray rectangular box containing the text 'domain.product.Product.get' followed by 'ProductLine' on a new line. Two blue arrows point from the right side of the top white box to the left side of the gray box, and from the right side of the bottom white box to the left side of the gray box.
